INTERNATIONAL PRELIMINARY EXAMINATION REPORT

REC'D 08 MAR 2004

WIPO

PCT

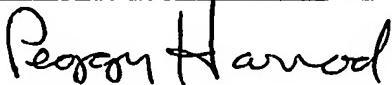

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference 02-701	FOR FURTHER ACTION	See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)
International application No. PCT/US02/41816	International filing date (day/month/year) 31 DECEMBER 2002	Priority date (day/month/year) NONE
International Patent Classification (IPC) or national classification and IPC IPC(7): H01J 40/14 and US Cl.: 250/221		
Applicant OTIS ELEVATOR COMPANY		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.
2. This REPORT consists of a total of 3 sheets.

This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority. (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of _____ sheets.
3. This report contains indications relating to the following items:
 - I Basis of the report
 - II Priority
 - III Non-establishment of report with regard to novelty, inventive step or industrial applicability
 - IV Lack of unity of invention
 - V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
 - VI Certain documents cited
 - VII Certain defects in the international application
 - VIII Certain observations on the international application

Date of submission of the demand 11 JULY 2003	Date of completion of this report 05 SEPTEMBER 2003
Name and mailing address of the IPEA/US Commissioner of Patents and Trademarks Box PCT Washington, D.C. 20231	Authorized officer QUE T. LE 
Facsimile No. (703) 305-3230	Telephone No. (703) 308-4890

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/US02/41816

I. Basis of the report

1. With regard to the elements of the international application:^{*} the international application as originally filed the description:

pages 1-7

pages NONE

pages NONE

, filed with the letter of _____

 the claims:

pages 8-9

pages NONE , as amended (together with any statement) under Article 19

pages NONE

pages NONE

, filed with the letter of _____

 the drawings:

pages 1-2

pages NONE

pages NONE

, filed with the letter of _____

 the sequence listing part of the description:

pages NONE

pages NONE

pages NONE

, filed with the letter of _____

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.
These elements were available or furnished to this Authority in the following language _____ which is: the language of a translation furnished for the purposes of international search (under Rule 23.1(b)). the language of publication of the international application (under Rule 48.3(b)). the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

 contained in the international application in printed form. filed together with the international application in computer readable form. furnished subsequently to this Authority in written form. furnished subsequently to this Authority in computer readable form. The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished. The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.4. The amendments have resulted in the cancellation of: the description, pages none the claims, Nos. none the drawings, sheets/fig none5. This report has been drawn as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).^{**}

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).

**Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/US02/41816

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. statement**

Novelty (N)	Claims <u>1-7</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-7</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-7</u>	YES
	Claims <u>NONE</u>	NO

2. citations and explanations (Rule 70.7)

Claims 1-7 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest a method for detecting interference energy in a sliding door safety system comprising the steps of: disposing emitter along a first vertical surface; disposing receiver corresponding to the emitter; activating the emitter to emit an energy beam having a modulated square wave of a predetermined frequency; sampling the energy intensity received by the receiver by activating the receiver a predetermined number of times and recording each time to form a plurality of recorded energy intensities; selecting the lowest magnitude one of the recorded energy intensities to form a lowest recorded energy intensity; comparing the lowest recorded energy intensity with a threshold value; and determining a source of the energy intensity to be external when the lowest recorded energy intensity is less than the threshold value.
